

Find the slope of the following pairs of points	Name:
using the slope formula: $m = \frac{y_2 - y_1}{x_2 - x_1}$.	Get plenty of
1. (1,3); (7,5)	1. Solve for y an 2x - 3y = 18
2. (-2,-3); (1,6)	
3. (-4,2); (4,-4)	2. Solve for y an 3x + 4y = -20
4. (-3,2); (-3,-5)	3. Solve for y an
5. (6,3); (-3,3)	x - 3y = 6
6. (0,-2); (5,0)	4. Solve for y an 2x + y = 6
